DECOPATÉ
DECOPATÉ

discoloration

It is a kit composed of two products : a solid phase whitener powder that must be mixed with another liquid phase in the vials.

method of use : into a clean bowl and put the metal content of one packet of DECOPATÉ solid phase. At this point, add the contents of a vial of DECOPATÉ liquid phase. With the help of a spatula to mix until a homogeneous bleaching cream. Add 100 ml of cream oxidant 10, 20, 30, 40 or Peroxyl. The exposure times ranging from 20 to 60 minutes depending on the hair and the type of the result you want to achieve.

box: pack with 12 sachets of 30 grams three cases of four vials each
