Studies of Gamma More to improve the efficiency of the dryer professional, was born a new technology : Energy Saving Technology that saves energy up to € 250 in a year. With a consumption of only 1250W, thanks to its great efficiency, the fon Range More IES has the same power as a common hair dryer 2500W. The shell and fully recyclable packaging made ??from recycled cardboard underline the attention of Range More for energy saving and for a sustainable world.

- Professional hair dryer with high efficiency
- Consumes only 1250 W with the same performance as a 2500W
- Special high efficiency Maximum heat resistance, consumption halved
- Structure and recyclable packaging
- Silent: only 68 dB
- Blow cold air
- Special air spreader nozzle designed to maintain the ideal temperature on hair
