HAIRDRYER MDGS

MDG Professional Hair Dryer

The ideal partner created to better express the talent and professionalism of the designer. The hair dryer dries hair gently Professional MDGs, without inaridirli, thanks to the combined action of negative ions and far infrared rays.

- **Technology Infrared**

Infrared rays make drying faster, while avoiding the stress of heat, penetrating deeply, play a bio-stimulating effect on the hair and assist in the improvement of local circulation, thus favoring the natural nourishment of the hair bulb. Drying is faster, sweeter and more intense.

- **Technology Ionic**

When using negative ions are emitted, which protect the natural moisture of the hair, carrying an anti -frizz and effectively fighting the electrostatic effect. Hair hydrated, soft and shiny.

- **Infrared Emitter.**

Resistance Starry multionda filament with molybdenum.

- **Negative ion generator.**

Sharpen the electrostatic effect. Promotes the beneficial effect of the hair. A hair healthy, strong and shiny gives beauty and charm to the face.
