SENSOR SYSTEM - THE PERMANENT WITH THE COMPUTER
SENSOR SYSTEM - la permanente con il computer

Permanent absolutely innovative because the result of the synergy between the chemical research and computer science. A technology -free sour alkaline agents, it does not alter the cuticle, the cortex does not swell or damage the keratin. Create movement and the support required due to the control of computer science which completely manages the process of ripple actively checking the 5 main variables that influence the activity of the reducer (reducer concentration, pH, temperature, exposure time, porosity).
