INFRARED PROFESSIONAL infrared plate

The INFRARED plate PROFESSIONAL combines the protective function of infrared rays to straightening and ionising properties of titanium Ceramic and Tourmaline. Infrared radiation emitted when using Act on the hair shaft from the inside riparandolo , favour the balance of the scalp and a deep anti-bacterial action. Combined with infrared Ceramic Tourmaline negative Ions to give hair moisture and shine to ensuring a smooth perfect without damaging them. The infrared heat enables the absorption of treatments carried out on hair while eliminating Frizz leaving hair smooth , extremely , hydrated and fed. MCH resistance Technology allows the plate to reach the temperature in a few seconds up to 230° C and keeps it constant throughout time.

Features:

- infrared emission;
- Ceramic Tourmaline Ion plates & titanium.
- Ionising properties;
- resistance MCH Technology: homogeneous and constant heat;
- upper plate for easier ironing.
- ergonomic design is light and handy;
- rebalancing action and anti-crespo;
- regenerative and protective action.

TECHNICAL SPECIFICATIONS

- digital temperature adjustable from 130° C to 230° C;
- Digital LCD display;
- Width 5 cm dishes;
- length 11 cm dishes;
- automatic switch-off in case of overheating.
- automatic switch-off in case of disuse (timer 60 minutes);
- closing plate button to store it safely;
- infrared protection from contact with liquids.
- electric cable length 3 m;
- Professional 360° swivel cord.
