TITANIUM PRO UPGRADE

Professional curling irons titanium

TITANIUM PRO curling irons have a thermostat with digital display to set the desired temperature for colors : the blue LED indicates that the iron is heating up, the green LED that the iron has reached 180 degrees, while the red LED indicates that the iron is set to the maximum temperature. All the tools in this line have a stylish rubberized finish for easy use and an attractive look. They also possess a double- strength ceramic curling irons MCH that allows TITANIUM PRO to arrive at the set temperature in a few seconds. The tube is made of titanium for a more even distribution of heat.
