COLOREVO MIX COLOREVO MIX

5 shades as well : to neutralize unwanted reflections, to create unlimited variations in color, must be mixed with other shades according to color theory.

2 neutral formulations to increase opportunities in coloration.

It consists of three different classes of ceramides : CERAMIDE 1, 3 and 6 II, with added fatty acids, and cholesterol Phytosphingosine of vegetable origin, for perfectly mimic the lipids naturally present in hair.

method of use : add an appropriate amount depending on the shade of choice. More clear is the hue, the lower the amount of COLOREVO MIX to add, except for COLOREVO BLOND. For shade Height 9-10 is advisable to add 5% to the total amount of cream, while darker shades and COLOREVO BLOND larger quantities, but in any case not exceed 30 % of the total cream. Mix then the total amount of cream in the ratio of 1 +1 (COLOEVO) or 1 +2 (COLOREVO BLOND) with COLOREVO OXY massing adequate.

box: 100 ml tube.
