GREAT LENGTHS - MULTISONIC

100 % natural human extension - extension for passion

Great Lengths has launched the most advanced and innovative application of the extension: the extraordinary ultrasound machine MULTISONIC. If MULTISONIC is the innovation that the company is most proud, you can not forget, however, that the needs of hairdressers are not all equal. That's why also offers two other cars from the technological characteristics very different from each other : ULTRASONIC5000 and GL3200.

MULTISONIC

multi- strand ultrasound safety of the result.

MULTISONIC is the extraordinary ultrasound machine that allows a perfect application, fast, gentle and imperceptible to the eye and to the touch, 5 strands at the same time. Thanks to its highly precise procedures, coded, automated, no unforeseen external event, any uncertainty operator can in no way invalidate the result. That's why MULTISONIC with the margin of error is reduced to zero. The locks made specifically for MULTISONIC contain a greater number of hair and allow to increase the mass, volume effects with all-natural. A true revolution for both the hairdresser, that can offer a professional and rewarding, but for the customer.
