SMART Reception

This elegant reception in white melamine captures attention entering the saloon, with a front panel covered with Sky available in a wide choice of Sky color, and its curve forming an angle of 90°, allow the desk to be positioned differently, while remaining compact enough, creating more room in the reception area. LED lighting accentuates the shape of the Panel covered with Sky, while adding importance to the reception.

The Smart case is available with side Windows and side cabinets (also available separately).
