CHROMATIQUE OXY EMULSION CHROMATIQUE OXY EMULSION

Hydrogen peroxide cream lightly scented to eliminate the bad odor of Ammonia, usually contained in the color oxidation. Perfectly stabilized to maintain production volume over time, it is enriched with conditioning agents to give shine to the hair and more lasting color.

method of use : Mix one part of Chromatique Color Collection with 2 parts of OXY EMULSION at 10 - 20 - 30 - 40 volumes (example : mix 50 ml of Chromatique Color Collection with 100 ml of OXY EMULSION). For series superlightening, mix 1 part Chromatique Color Collection with 3 parts OXY EMULSION (example : mix 50 ml of Chromatique Color Collection series Superlight with 150 ml of OXY EMULSION).

box: 1000 ml bottle
